REPAIR GUIDELINE

BACKPACK HARNESS_BH1000

Version: 1

Issue Date: 2017/09/11

- 1. Remove the battery from the backpack harness.
- 2. Remove the strap and hook from harness (refer to the operator's manual).

| Description | Part Number | QTY. |
|----------------------|-------------|------|
| Backpack subassembly | 2825497001 | 1 |
| Hook | 3129102001 | 1 |

3. Loosen and remove the 10 screws to disassemble the rear housing.

| Description | Part Number | QTY. |
|---------------|-------------|------|
| Rear housing | 3322283001 | 1 |
| Tapping screw | 5610294001 | 10 |

4. Loosen screw 1&2 to remove cord anchor, disconnect connectors 1&2 and remove the power cord ASSY. If power cord ASSY is broken, replace it with a new one.

Note: Align the wires in the groove after replacing as shown in the picture below.

| Description | Part Number | QTY. |
|-----------------|-------------|------|
| Power cord ASSY | 4810227001 | 1 |
| Cord anchor | 3700285001 | 1 |
| Tapping screw | 5610294001 | 2 |

5. Loosen screws 3,4,5,6,11&12 then remove the cord anchor, which is attached with a sponge pad. Disconnect connectors 1&2 to totally separate the electric assembly from the front housing.

Note: Align the wires in the

| Description | Part Number | QTY. |
|--------------------|-------------|------|
| Self tapping screw | 5610274001 | 10 |
| Sponge pad | 3706436001 | 1 |
| Cord anchor | 3700285001 | 1 |
| Electric assembly | 2830264001 | 1 |

6. Loosen 7,8,9&10 to remove the dust cover. Replace the broken one in the below table.

| Description | Part Number | QTY. | Description | Part Number | QTY. |
|----------------------|-------------|------|----------------------|-------------|------|
| Support | 3128359001 | 1 | Power pack button #2 | 3127498001 | 1 |
| Spring | 3660013003 | 1 | Front housing | 3129073001 | 1 |
| Power pack button #1 | 3127497001 | 1 | Dust cover | 3128361001 | 2 |

NOTICE: When assembling the power pack button #1 and power pack button #2 into the front housing, pre-assemble the spring onto the power pack button #1 and and then follow the steps below to locate the buttons into the groove of the housing.

Power pack button #1 Power pack button #2

7. Loosen the 4 screws to remove the bottom support.

| Description | Part Number | QTY. |
|----------------|-------------|------|
| Bottom support | 3129071001 | 1 |
| Tapping screw | 5610294001 | 4 |

8. Remove the white lever and torsion spring. Remove 8 screws and cord anchor to disassemble the ejection mechanism. If any part is broken, replace it accordingly.

| Description | Part Number | QTY. | Description | Part Number | QTY. |
|--------------------|-------------|------|----------------|-------------|------|
| Ejection mechanism | 3126773001 | 2 | White lever | 3126773001 | 1 |
| Tapping screw | 5610294001 | 8 | Torsion spring | 3660682001 | 1 |
| Cord anchor | 3122798001 | 4 | Spring | 3660306002 | 2 |

9. Assemble all parts in reverse order.

Note: There is no specific order for assembling the bottom support and the rear housing. Finally, assemble back the strap and the hook(refer to the operator's manual).
